

Pocket Mask™

One-way Valve Silicone Masks

Redefining Patient Care Beyond Expectations

Reliability and variety go beyond expectations, providing easy medication delivery and improved patient comfort.

Redefining Patient Care — *Diagnostic Confidence*

Available in four convenient sizes, each Pocket Mask houses a flow control valve, offering the option of tidal breathing, improving aerosol delivery for pediatric and adult patients.

Redefining Patient Care — *Improving Outcomes*

As a part of our family of asthma and disease management products, Pocket Mask embodies years of dedication to advancing the quality of lung health.

We continue redefining patient care so that you can achieve improved patient outcomes, more efficiently, more profitably.

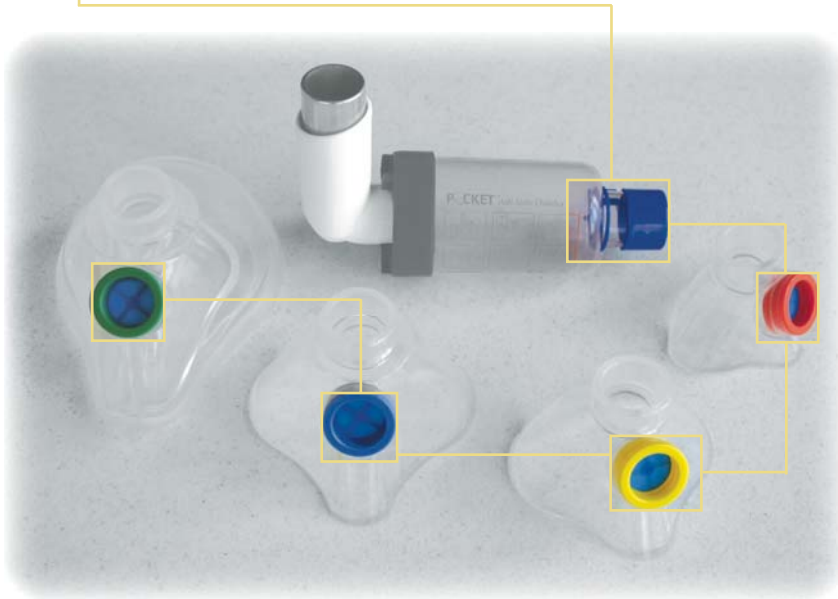

Redefining Patient Care — *Proven Technology*

- **One-way Valve.** Allows the patient to exhale without removing the mask, increasing convenience and ease-of-use.
- **Various Sizes.** Four sizes to fit every patient, infant to adult.
- **Latex Free.** High-quality, latex free silicone enhances the life of each Pocket Mask.

Redefining Accuracy. Beyond Expectations.

Pocket Mask is designed to bring comfort while providing highly effective drug-dose delivery.

Related Products

Pocket Chamber[®]

Pocket Chamber is a compact aerosol holding chamber using new anti-static technology with a flexible end-piece that fits virtually any metered dose inhaler.

Pocket Chamber utilizes a one-way silicone valve to avoid loss of medication due to poorly timed exhalation.

Signature features include: Anti-static material and a built-in whistle to alert user of excessive inspiratory rate.
